

“Websense Web Filter was the only product that offered filtering, flexible reporting, and tight firewall integration, while meeting all our technical requirements.”

Richard Lehan

Director of IT
Kozy Shack Enterprises

Websense Web Filter Solutions

Unmanaged Internet access presents many challenges and introduces unnecessary risk. Websense® Web Filter is the leading Web filtering solution that helps organizations manage productivity, reduce legal liability and improve bandwidth to make employee Internet use efficient and effective.

Industry-Leading Web Filtering

The award-winning Websense Web Filter solutions have long been recognized in independent research studies and market share reports as the premier Web filtering solutions. Customers around the globe have chosen Web Filter solutions to protect their users and technology assets because of their comprehensive and accurate control over Internet use. No other solutions are backed by over 15 years of Web filtering experience, the knowledge and skills of a global research staff of 130 professionals, and the Websense ThreatSeeker® Network.

Websense Web Filter solutions offer:

- Industry-leading Web filtering
- Advanced control over applications and network protocols
- Simple, yet scalable management

Powered by the Websense ThreatSeeker Network

The ThreatSeeker Network cloud-based security intelligence is at the heart of the protection offered by Websense Web Filter solutions. The ThreatSeeker Network updates the Web filtering database to ensure up-to-date and accurate identification from inappropriate content. It leverages a host of advanced analytics including rules, signatures, heuristics, behavior analysis, Web reputation services, and URL categories. In addition, unique Defensio™ technology identifies inappropriate user-generated content as it is posted to Web sites before users or URL scanners ever visit a site.

Advanced Application Controls

Applications like IM and P2P can decrease efficiency and expose organizations to security risks and data loss. Websense on-premise Web Filter solutions software provides control over 125 network protocols and thousands of applications to mitigate risk from unauthorized applications. Policy actions extend from simple blocking to granular bandwidth controls.

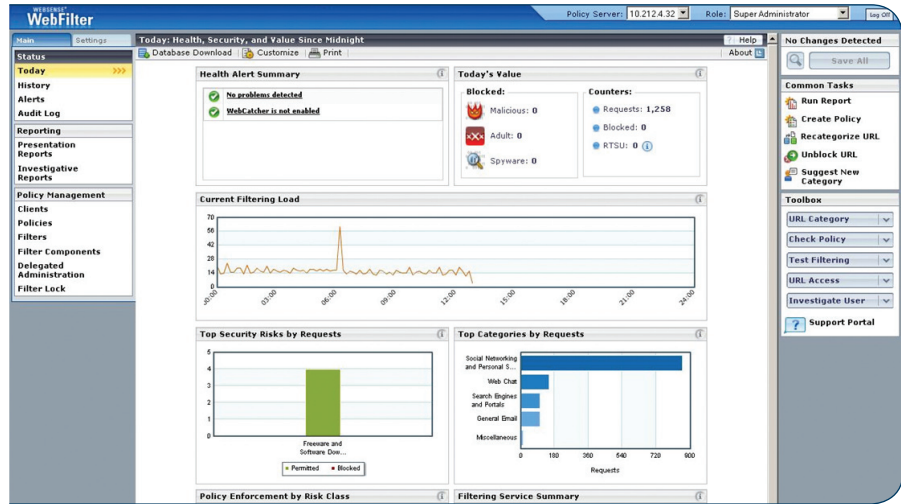

Simple, Yet Scalable Management

Websense Web Filter solutions centralized management architecture scales from the small single-site business to the large Fortune 100 distributed enterprise. An intuitive Web interface simplifies policy management while an intuitive dashboard puts actionable reports at your fingertips. Web Filter solutions require less effort to manage than competitive solutions, while providing greater visibility and control.
